

## **Heidmar joins the UK Chamber of Shipping**

The UK Chamber of Shipping is delighted to announce Heidmar as the latest member to join the organisation.

Heidmar is the original commercial management brand in the tanker space and was the first shipping company to develop a digital solution, eFleetWatch, designed to build trusting and transparent relationships with ship owners.

With over 30 years of experience, Heidmar success comes from their ability to be agile, lean, and well-positioned to respond to both the opportunities and the risks that exist in the tanker space. Recently Heidmar has also expanded into Drybulk commercial management, Technical Services and E-Learning.

Commenting on their membership, Pankaj Khanna from Heidmar said:

“Heidmar has a long established presence in the UK maritime community and I am pleased to further cement that with the membership of the Chamber of Shipping. We hope to build on Heidmar’s presence in the UK and contribute to the community through the over three decades of experience in commercial management.”

Welcoming Heidmar to the Chamber, Head of Membership at the Chamber of Shipping Tony Jerome said:

“We are absolutely thrilled to welcome Heidmar to the UK Chamber of Shipping. We are always looking to grow our membership and we are delighted to welcome a company such as Heidmar to the Chamber. With a range of committees and panels, the Chamber really can make a difference for all our members and we look forward to working with the team at Heidmar to help them go from strength-to-strength.”

The Chamber has nearly 200 members and is the voice of the shipping sector in the UK, aiming to promote and defend the industry to politicians and the public.

If anyone is interested in joining the Chamber, please get in touch with our Head of Membership [Tony Jerome](#).
